Abstract

Decentralized Apps are furthering the frontier of cryptocurrencies, however the uprise of recent user-created smart contracts have limited applications and limited accessibility. Furthermore, several tokens are created with the same regurgitated short-sighted vision that provides no long term value for the stakeholders. MoonOwl seeks to provide that value to multiple smart contract based blockchain ecosystems with an altruistic use-case and high-percentage dividend returns.

What is MoonOwl?

MoonOwl is a charity-oriented DeFi project built on multiple dApp oriented blockchain ecosystems—currently Polygon—with plans to expand to other DeFi networks. MoonOwl will provide charity to necessary causes, while executing necessary mechanics to ensure longevity of the token. These mechanics include, LP acquisition, reflection, and burn. A portion of each successful transaction will firstly provide liquidity to the corresponding decentralized exchange (DEX). Through reflection, all holders of the currency will receive a proportioned and redistributed amount of \$MOWL. Furthermore, a burn is applied to ensure deflation of the currency, which maintains it's value and longevity. Finally, every selling transaction will provide to our community governed charity wallet, where we let stakeholders hold the power to decide which charity organizations to donate to.

MoonOwl's Vision

The MoonOwl team has chosen to remain anonymous during the entire development phase of the project. This allows the team to work safely, while preserving our own private lives. The MoonOwl team consists of 6 people. The team is completed by the community that supports the project.

In addition, the MoonOwl team has chosen to interact with the community by giving them the opportunity to contribute to the progress of the project. The community will have full governance of the charity wallet and a voting platform will be available for all holders in which the majority may choose what cause they would like to help. Each separate blockchain version of \$MOWL will have it's own voting platform, this will be so that multiple causes will be reached out to.

Why Charity?

Charity is the fundamental and foundational pillar on which MoonOwl has been developed. Through sharing our love and kindness to others unconditionally, MoonOwl aims to make a change in this world beyond just blockchain environments. Particularly in this difficult time in which a global pandemic has ravaged the financial stability of many families and organizations, MoonOwl aims to provide value back to the community through dedicated causes chosen by its important stakeholders. Through this, we become a token that matters to the stakeholders more. We are not just a token, we are family. MoonOwl aims to serve important causes such as COVID-19 relief, child sex trafficking, hunger, poverty, victims of war and so much more. So we ask you, the stakeholder, to look inside yourself, identify what is truly important to you, and stand as a leader in our community through giving back.

Tokenomics of MoonOwl

General Token Information

Token ticker: \$MOWL

Total supply: 1,000,000,000,000,000

Blockchain: Polygon (MATIC) and more currently in the works!

Polygon Contract Address: TBA

Token Distribution

70% for Launch

10% for Burn wallet

5% for Developers

15% for Whitelisters (0.5% per address) to provide initial liquidity

5,000,000,000,000 per 1000 MATIC in presale and

23,333,333,333,333 per 1000 MATIC on listing

Transaction Fees

4% of every transaction contributes to the Rewards pool where holders will be able to claim free MATIC.

4% of every transaction contributes toward automatically generating further liquidity. This benefits everyone who holds MoonOwl.

1% of every transaction is burned further decreasing the total supply of MoonOwl.

2% of every transaction is taken and re-distributed to all MoonOwl holders.

However 1% of every **selling** transaction is placed into the community charity wallet.

MoonOwl will have a 11% buyer tax and a 12% seller tax. This is to create incentive for holders and discourage sellers from dumping. As these transaction fees take place, a portion of it will be distributed into our various reward pools and charity wallet. Holders will be able to place a vote on our web deciding the collective's charity of choice.
